Overview

The JetWave 3300 is an industrial grade Cellular IP gateway which enables access to the Ethernet, WIFI and Serial port communication over the 3G Cellular network. The JetWave 3320 is equipped with one embedded 3G module, 2 Gigabit Ethernet ports, 802.11n 2.4G/5G selectable WIFI radio and 1x RS232/422/485 Serial Port.

The embedded 3G cellular module supports UMTS/HSPA+ band and backward support of GSM/GPRS/EDGE quad-band. These bands are extremely popular applications in cellular network and which comfort for the requirements to setup a cellular network. The WIFI radio supports 2T2R, 300Mbps data rate, and the wireless mode supports Access Point, Client, WDS-AP, WDS-CPE modes. The JetWave 3320-M12 equips with dual Gigabit Ethernet M12 anti-vibration connector for vehicle installation.

The key feature of the JetWave 3300 series include IP Gateway, such as the LAN/WIFI to 3G Routing and Redundant, high speed gigabit Ethernet transmission, abundant value-added software and the wireless security request. The WIFI Radio of the JetWave 3300 series can function as an AP/CPE, WDS modes for different point to point or point to multiple point network applications. The additional Auto IP Report feature allows to remote monitor and access the cellular interface, perform auto location positioning even without static IP address.

The JetWave 3300 series is an industrial grade design with the significant features of gigabit PoE+, dual 24V(12~48V)DC power input, IP31 Housing and Digital Input/Output. The design of the EN50121-4 approved and wide operation temperature design allows users to install the device under harsh environmental conditions.

Remote or Mobile Over 3G Network

The embedded 3G module offers high speed GSM/ GPRS/EDGE or UMTS/HSPA+ connection which enables remote and mobile control to the LAN and WIFI interfaces.

IP Gateway Routing

Set the 3G as WAN and the Gigabit Ethernet and WIFI as LAN, it performs perfectly the IP Gateway routing between LAN to 3G and WIFI to 3G.

Serial to Cellular

The device equips with one RS-232/422/485 serial port. It supports TCP Server, TCP Client and UDP service mode. It is ideal industrial serial to cellular solution for remote serial operation and M2M connectivity.
