### Introduction

ADLINK cPCI-7230 is a 16-CH isolated digital input and 16-CH isolated digital output module for PXI/CompactPCI form factor. The device provides a robust 5,000 V<sub>RMS</sub> isolation protection which is suitable for most industrial applications. The wide input range makes the cPCI-7230 easy to sense the status of external devices. A potential difference of 3 to 24 V between two input terminals is logic high. Logic low is between 0 to 1 V. The device features a wide output range from 5 to 35 V, suitable for relay driving and industrial automation applications. It also provides two interrupt sources on digital input channels, which are easily user-configurable.
